PRINTERS TO THE ROYAL SOCIETY.
MDCCLXXXV.

A D V E R T I S E M E N T.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a Body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable, that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such, as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society ; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices ; which in some instances have been too lightly credited, to the dishonour of the Society.

- I. *O*Bservations on the Graduation of Astronomical Instruments ;
with an Explanation of the Method invented by the late
Mr. Henry Hindley, of York, Clock-maker, to divide Circles
into any given Number of Parts. By Mr. John Smeaton,
F. R. S.; communicated by Henry Cavendish, Esq. F. R. S.
and S. A. Page 1.
- II. A Series of Observations on, and a Discovery of, the Period
of the Variation of the Light of the Star marked δ by Bayer, near
the Head of Cepheus. In a Letter from John Goodricke,
Esq. to Nevil Maskelyne, D. D. F. R. S. and Astronomer
Royal. p. 48
- III. Magnetical Experiments and Observations. By Mr. Tiberius
Cavallo, F. R. S. p. 62
- IV. On Infinite Series. By Edward Waring, M. D. F. R. S.
Lucasian Professor of Mathematics at Cambridge. p. 81
- V. Experiments on Hepatic Air. By Richard Kirwan, Esq.
F. R. S. p. 118
- VI. Observations on the Affinities of Substances in Spirit of Wine.
In a Letter to Richard Kirwan, Esq. F. R. S. by John
Elliot, M. D. p. 155

- VII. *An Account of some minute British Shells, either not duly observed, or totally unnoticed by Authors. In a Letter to Sir Joseph Banks, Bart. P. R. S. by the Rev. John Lightfoot, M. A. F. R. S.* p. 160
- VIII. *Observations on the Sulphur Wells at Harrogate, made in July and August, 1785. By the Right Reverend Richard Lord Bishop of Landaff, F. R. S.* p. 171
- IX. *Observations and Remarks on those Stars which the Astronomers of the last Century suspected to be changeable. By Edward Pigott, Esq.; communicated by Sir Henry C. Englefield, Bart. F. R. S. and A. S.* p. 189
- X. *An Account of a Subsidence of the Ground near Folkestone, on the Coast of Kent. In a Letter from the Rev. John Lyon, M. A. to Edward King, Esq. F. R. S. and A. S. Communicated by Mr. King in a Letter to Charles Blagden, M. D. Sec. R. S.; with Remarks.* p. 220
- XI. *Particulars relative to the Nature and Customs of the Indians of North-America. By Mr. Richard M^c Caufland, Surgeon to the King's or Eighth Regiment of Foot. Communicated by Joseph Planta, Esq. Sec. R. S.* p. 229
- XII. *Abstract of a Register of the Barometer, Thermometer, and Rain at Lyndon in Rutland, in 1785. By Thomas Barker, Esq. Also of the Rain at South Lambeth, in Surrey; and at Selbourn and Fyfield, Hampshire. Communicated by Thomas White, Esq. F. R. S.* p. 236
- XIII. *An Account of Experiments made by Mr. John M^c Nab, at Henley-House, Hudson's Bay, relating to freezing Mixtures. By Henry Cavendish, Esq. F. R. S. and A. S.* p. 241

THE President and Council of the Royal Society adjudged,
for the Year 1785, the Medal on Sir GODFREY COPLEY's
Donation, to Major-General WILLIAM ROY, for his Mea-
surement of a Base on Hounslow-Heath.
